roundy

ROUNDY. Steady. Go !

BALCAR is launching its new ROUNDY, an ideal solution to create a powerful light alongside the optical axis of your camera. Thanks to the benefits of its fluorescent lighting, the Roundy light produces a direct lighting without any shadows or hotspots which are the two typical drawbacks of a standard ENG lamphead. The ROUNDY is perfect for interviews, advertisements, travellings, clips, fiction and steady shots.

The ROUNDY is mounted on the camera shoe or onto its main arm and offers a wide range of movements.

The BALCAR ROUNDY is the most powerful ring-light on the market : the 55 Watts power allows a wider choice of f-stops thus a much better control of the depth of field. You can adjust the intensity of the light with the built-in dimmer to preserve the atmosphere, without any change of the colour temperature.

Technical specifications:

- Unique lighting range up 20ft (6m) ;
 - Built-in dimmer ;
 - Versatile with possibility of multiple positions ;
 - On-axis lighting with no shadows and no hotspots ;
 - Mounted on the camera shoe or onto its main arm ;
 - Constant colour temperature ;
 - 110V / 230V A/C ;
 - 12V D/C ;
 - Options:
 - 4 Barn doors,
 - Diffuser,
 - Battery, ...
-
- Power consumption: 60W
 - Candelas: 850
 - Weight: 3,4 kg
 - D/C volt: 12V
 - A/C volt: 110V~230V
 - Dimming: manual
